

EON Electricity Renewal July 2022

The council received a letter the day the agenda went out with our renewal cost for the electricity at the cemetery – the contract is due for renewal on September 24th 2022 – before the next council meeting. The clerk has not yet had time to make comparisons with other suppliers. The new cost is £188 more than last year – a variable contract but no tie in. See below for figures.

There is a fixed price option of 1 and 2 years but at the time of writing EON had not come back with prices.

Depending on the fixed price options (if we receive them before the July meeting); it's recommended that we stay with EON on the variable contract whilst the clerk investigates competitive prices from other suppliers.
